Part 3 发音精讲

Pronunciation and Intonation

Custom has not commonly been regarded as a subject of any great moment. The inner workings of our own brains we feel to be uniquely worthy of investigation, but custom, we have a way of thinking, is behavior at its most commonplace. As a matter of fact, it is the other way around. Traditional custom, taken the world over, is a mass of detailed behavior more astonishing than what any one person can ever evolve in individual actions, no matter how aberrant.

Pronunciation and Intonation

Yet that is a rather trivial aspect of the matter. The fact of first-rate importance is the predominant role that custom plays in experience and in belief, and the very great varieties it may manifest.

No man ever looks at the world with pristine eyes. He sees it edited by a definite set of customs and institutions and ways of thinking.

Pronunciation and Intonation

Even in his philosophical probings he cannot go behind these stereotypes; his very concepts of the true and the false will still have reference to his particular traditional customs. John Dewey has said in all seriousness that the part played by custom in shaping the behavior of the individual, as against any way in which he can affect traditional custom, is as the proportion of the total vocabulary of his mother tongue against those words of his own baby talk that are taken up into the vernacular of his family.

Pronunciation and Intonation

When one seriously studies the social orders that have had the opportunity to develop autonomously, the figure becomes no more than an exact and matter-of-fact observation. The life history of the individual is first and foremost an accommodation to the patterns and standards traditionally handed down in his community. From the moment of his birth, the customs into which he is born shape his experience and behavior.

Pronunciation and Intonation

By the time he can talk, he is the little creature of his culture, and by the time he is grown and able to take part in its activities, its habits are his habits, its beliefs his beliefs, its impossibilities his impossibilities. Every child that is born into his group will share them with him, and no child born into one on the opposite side of the globe can ever achieve the thousandth part. There is no social problem it is more incumbent upon us to understand than this of the role of custom.

Pronunciation and Intonation

Until we are intelligent as to its laws and varieties, the main complicating facts of human life must remain unintelligible. The study of custom can be profitable only after certain preliminary propositions have been accepted, and some of these propositions have been violently opposed. In the first place, any scientific study requires that there be no preferential weighting of one or another of the items in the series it selects for its consideration.

Pronunciation and Intonation

In all the less controversial fields, like the study of cacti or termites or the nature of nebulae, the necessary method of study is to group the relevant material and to take note of all possible variant forms and conditions. In this way, we have learned all that we know of the laws of astronomy, or of the habits of the social insects, let us say. It is only in the study of man himself that the major social sciences have substituted the study of one local variation, that of Western civilization.

Anthropology was by definition impossible, as long as these distinctions between ourselves and the primitive, ourselves and the barbarian, ourselves and the pagan, held sway over people's minds. It was necessary first to arrive at that degree of sophistication where we no longer set our own belief against our neighbor's superstition. It was necessary to recognize that these institutions which are based on the same premises, let us say the supernatural, must be considered together, our own among the rest.

Part 4 语法写作

名词性从句到主谓结构的转变

句 1: What he sees is edited by a definite set of customs and institutions and ways of thinking.

句 2: He sees it edited by a definite set of customs and institutions and ways of thinking.

句 1 使用名词性从句 what he sees 作为主语，表示他所看到的东西，句子的焦点在于“他所看到的东西”本身，以及这些东西如何被编辑，what he sees 通过被动语态强调了这些东西受外界因素（即习俗、制度和思维方式）的影响和编辑

句 2 使用主谓结构 he sees，表示他看见，强调他看见了什么，句子的焦点在于“他”的动作（看见）以及他看到的东西被外界因素（即习俗、制度和思维方式）编辑的状态，主语“他”的存在让句子变成主动语态，更加突出行为者的动作

句 1 到句 2 的变化体现了英语中的一种重要语法现象，即从名词性从句到主谓结构的转变，这种转变使得句子的表达更加灵活，可以根据需要强调不同的方面：名词性从句适用于突出被观察的事物及其状态，而主谓结构则更适用于强调观察者的行为和动作，通过这种结构的调整，英语可以更有效地传达信息和表达意图

句 1: What he knows is limited by his education.

句 2: He knows it limited by his education.

分析：句 1 使用名词性从句 what he knows 作为主语，表示他所知道的东西，通过被动语态强调知道的东西受教育限制；句 2 使用主谓结构 he knows，表示他知道，强调他知道了什么，主动语态更加突出行为者的动作
